Exam Focused Learning

The way you have learned so far has already been successful, however something has changed, you now have to learn faster and you have to learn more. Professional accountancy exams are demanding and so you need the best approach. This course will help you focus on what is important so that you spend your time more effectively and learn only the things that will help you pass.

Calculations Made Easy

Being able to do basic mathematical calculations is crucial for professional accountancy examinations. If it has been a long time since you have done any maths or used a scientific calculator then this course is definitely for you. It is particularly useful for students who are about to study the Fundamentals Level after a gap from mathematical studies.

Professional Marks

All ACCA papers at the Essentials and Options levels have 4 or 5 marks allocated to professional writing. In this short presentation you will find out exactly how these marks can be achieved and in doing so add those few extra percent to your overall score; achieving an overall pass for December 2010!. The session will include illustrations of marking allocation and practical exercises on past paper questions.
